NATIONAL CATTLE HEALTH STATEMENT

VERSION 1
August 2012

Attached to accompanying NVD / Waybill No: _____

Consignment PIC Number (must be completed): _____

SECTION 1 – Consignment Information (must comply with the information provided on an NVD, if attached)

Owner of cattle: _____

Phone number: _____

Address of origin of stock: _____

Destination Property Identification Code (PIC) (if known): _____

Description of cattle (e.g. breed, sex & type): _____

Were all the cattle vendor-bred on the above property: Yes No

SECTION 5b – Current Vaccinations (see explanatory notes for further information)

Clostridial vaccination (e.g. 5 in 1): Yes No Clostridial vaccination (Bovilis): Yes No

Pasture vaccination: Yes No Bovine ephemeral fever vaccination: Yes No

Leptospirosis vaccination: Yes No Viteline vaccination: Yes No

Other Vaccinations (specify): _____

SECTION 5c – Pestivirus Testing (see explanatory notes for further information)

Have these cattle been tested for the presence of pestivirus antigens (in blood, skin or hair)? Yes No

If tested, were any cattle positive for pestivirus antigen? Yes No

If tested, were the cattle found to be persistently infected? Yes No

Other (specify): _____

SECTION 2 – Johne's Disease Beef Cattle (see explanatory notes for further information)

The cattle originate from the following BVD Zone/Area: _____

Protected Zone Free Zone Beef Protected Area Management Area

The cattle originate from a herd with a status of:

Infected Suspect Non-Assessed Check Treated Beef Only

Treated to MAP Standard Treated - eye MSH MNG MNO

Beef Protected Area beef cattle (non-assessed) eligible for the Protected Zone

SECTION 6 – Declaration (see explanatory notes for further information)

As the owner/signatory (please clarify) responsible for the husbandry of the cattle in this consignment, I declare that the above information in this statement is true and correct.

Signed: _____ Name: _____

Date: ____/____/____ Phone no: _____ Address: _____

Persons making false statements may be liable under fair trading and other relevant State legislation.

SECTION 7 – Cattle Tick (see explanatory notes for further information)

I _____ (tick name of inspector or authorized person)

Declare that the stock described above are from a tick restricted property in a stable tick free area. OR

Declare that the stock described above comply with the cattle tick entry requirements for _____ OR

Where treatment and/or inspection was required the following inspection and/or treatment was undertaken: Type of inspection: _____ (tick inspection and/or surveillance)

Treatment: (chemical) _____ Method of treatment: (spray/dip/spray-pour on - injection)

Signature: _____ Designation: _____

Date: ____/____/____ Phone no: _____ Location: _____

SECTION 3 – Johne's Disease Dairy Cattle (see explanatory notes for further information)

The consignment has a Dairy Assurance Score of: _____

Part A (herd base score): _____ Part B (self credits): _____ Part C (total Dairy Score): _____

SECTION 4 – Extrinsic Bovine Leucosis (EBL) (see explanatory notes for further information)

EBL test result for animals being moved: _____

Date of test: ____/____/____

Are the cattle from an EBL accredited or certified free herd: Yes No

SECTION 8 – Certification by an Authorized Person (to be completed for interstate or interstate movements only where required) (see explanatory notes for further information)

According to the information provided above, and after due investigation of jurisdictional records by me, I certify that the health status of the consignment of cattle described above complies with the jurisdictional requirements pertaining to _____ (destination State/Territory)

Signed: _____ Name: _____

Date: ____/____/____ Phone no: _____ Location: _____

SECTION 5a – Treatments (see explanatory notes for further information)

Treatments	Product	Date of treatment within last 6 months
Liver treatments		
Drench		
Liver fluke treatment		
Other treatments (type)		
Comments (optional)		

CATTLE HEALTH STATEMENT EXPLANATORY NOTES

VERSION 1
August 2012

PLEASE NOTE: It is law in all States/Territories for all cattle to be identified with NLIS devices before being moved. It is the responsibility of the cattle at the destination (unless purchased at a sale/yards) who is required to send the necessary NLIS information to the NLIS database.

This is a voluntary form however, those owners planning to move cattle interstate should check that state's requirements and contact the local animal health officer to obtain any additional paperwork.

INSTRUCTIONS FOR USE

Complete all relevant sections and SIGN at section 6

Authorised Person - complete all relevant sections and SIGN at section 7 & 8

- Beef cattle sections 1, 2, 4, 5, 7
- Dairy cattle (all cattle born on a dairy farm) sections 1, 3, 5

SECTION 2 – John’s Disease Beef cattle

BJD Zones/Arms

The accompanying map shows the BJD zones in Australia. For more information, go to www.bjd.govt.nz

Beef Only Herds

Beef cattle are all cattle except those born on a dairy farm. For a herd to be eligible as Beef Only, it must meet ALL the following criteria:

- The cattle are from a beef herd that has not grazed with dairy cattle, or first generation dairy-cross cattle, at any time during the past five (5) years, unless those cattle were from a herd enrolled in the CattleMAP.
- The cattle are from a beef herd that has not, at any time in the past, grazed on land that had been grazed by adult dairy cattle (two years or older) during the 12 months before the arrival of the beef herd, unless those dairy cattle were part of a CattleMAP herd.
- If introduced into the herd or onto the property(s) in the past five (5) years, the cattle are from herds of the same Beef Only or higher status. This must be supported by a completed National Cattle Health Statement or a signed BJD Vendor Declaration. Without these declarations, you cannot claim Beef Only status for any cattle sold from the herd.
- The cattle do not include animals that have been part of a herd classified as Infected (IN), Suspect (SU) or Restricted (RE), according to the National John’s Disease Standard Definitions and Rules and Conditions (SDR&Cs) for John’s Disease in Cattle.

Enrolled in MAP Standard (TMS)

A herd Enrolled in MAP Standard (TMS) is one that does not have an assessed status but which has undergone testing on the herd equivalent to a Sample Test under a MAP program in the last 24 months with negative results.

Enrolled Four Years Old and over (TAYO)

A herd Enrolled Four Years Old and over (TAYO) is one in which cattle aged four years old and over have been tested in accord with sample sizes in the Testing strategies section of the CattleMAP program.

Beef Protected Area Beef cattle (non-assessed) eligible for the Protected Zone

A beef herd in the Beef Protected Area that, in the past five years, has not introduced dairy cattle or dairy-cross cattle, or grazed on land used by dairy cattle, unless the dairy cattle concerned had a CattleMAP status of MS1 or better.

Notes: Cattle from the Management Arms are only eligible for the Protected Zone if they have an MS1 status or above in the CattleMAP, or are Beef Only.

SECTION 3 – John’s Disease Dairy Cattle

John’s disease herd status information about Dairy Assurance Score calculation is available at www.dairyaustralia.com.au/hjd

SECTION 4 – Exotic Bovine Leucosis (EBL)

All cattle entering Tasmania must meet at least ONE of the following criteria:

- Cattle have been tested for Exotic Bovine Leucosis with the ELISA test within 42 days before shipment with negative results and evidence supplied via an attached laboratory report. If samples were pooled, no more than 50 sera or 30 milk samples were combined in each pool. Unvaccinated calves less than 12-weeks-of-age transported with their dam do not require testing for EBL. OR
- Dairy cattle from a registered dairy herd must be accredited as Monitored Negative (MN) or better, according to the national guidelines for Exotic Bovine Leucosis Control, OR

- Beef or beef-cross breeds must come from herds in Victoria, South Australia, Western Australia (excluding the cattle tick infested areas), New South Wales (excluding North Coast Livestock Health and Foot Authority District), or Queensland (excluding the cattle tick infested areas). The herd of origin must have been in existence for at least three (3) years with no evidence of Exotic Bovine Leucosis infection in the last three (3) years.

SECTION 5A, 5B AND 5C – Treatments, Current Vaccinations and Testing

Treatments

- Provide details on any cattle treatments, vaccinations and management procedures within the last six (6) months. Some manufacturers include more than one of the categories listed below in the same vaccine, known as a combination vaccine. If you use a combination vaccine, only specify, as appropriate, should be detailed.
- For vaccinations to be current, you must have followed the manufacturer’s recommendations for vaccination. Typically, young animals or first time vaccinated animals need two (2) doses, followed by annual boosters. As variations to this general rule do occur, you must use the manufacturer’s recommendations.

Current Vaccinations

- A Clostridial 5-in-1 vaccine provides protection against tetanus, Blackleg, Black disease, pulpy tail (contortosis) and malignant oedema.

Testing

- Presumably infected animals can be detected by conducting a positive antigen test. This test only needs to be conducted once in an animal’s life. Cattle that test positive in most cases are persistently infected animals. Contact your veterinarian for assistance in understanding the test results or go to www.bjd.govt.nz.

SECTION 6 – Declaration

- This section must only be completed by the owner or person responsible for the husbandry of the cattle in the consignment.
- The original is to be attached to the National Vendor Declaration (NVD) form accompanying the cattle. The duplicate remains with the vendor.

SECTION 7 – Cattle Tick

Parts of Queensland, Northern Territory and Western Australia are declared under the relevant state legislation as Cattle Tick Infested Zones. All other parts of Australia are Cattle Tick Free Zones. Section 7 is mandatory for cattle moving:

- From an Infested Zone unless in another Infested Zone
- From a property in the Free Zone with cattle tick infestation
- Between some states (please check with the local animal health officer).

SECTION 8 – Certification by an Authorised Person

- This section must be signed by an authorised person if required for interstate and interstate movements (please check with your local agriculture department or on departmental websites for this information).
- Some states require testing or certification additional to that outlined in this document. Please check the entry requirements for any interstate movements at www.animalhealthaustralia.com.au/programs/johns-disease/disease-movement-requirements-for-stock/

NOTE: The Cattle Health Statement is a legal document. Please read carefully before signing.
